Profile

Creative and detail-oriented product designer with more than a year of experience crafting compelling digital experiences through user-centric and visually impactful designs. Skilled in visual design, prototyping, and user research, delivering intuitive products that enhance user satisfaction and drive business growth.

Skills

- **Design Tools:** Figma, Adobe After Effects
- **Prototyping:** Figma, Lottie
- **User Research:** Interviews, Usability Testing

Experience

Product Designer Arnifi, Dubai
October 2024 – December 2025

- Designed, revamped, and refined user interfaces for core services, improving usability and visual consistency across platforms.
- Developed and implemented a comprehensive design system that standardizes typography, spacing and UI components, reducing design-to-development friction by 40%.
- Created motion graphics and animated assets using After Effects and Figma, enabling seamless developer handoff.
- Produced marketing videos for social media, increasing weekly impressions from 15,073 to an average of 32,193 since June 2025.
- Built Excel-based compliance tracking templates, improving documentation accuracy and organizational efficiency.

Product Designer Attack Capital, New York
December 2025 – Present

- Designed end-to-end user experiences for four AI-powered SaaS products across healthcare, legal technology, conversational AI, and sales enablement, translating product requirements into intuitive enterprise applications.
- Collaborated directly with founders to define product workflows, validate new features, and rapidly iterate on MVPs from concept to production-ready designs.
- Leveraged Claude, Lovable, and Figma to rapidly prototype product ideas, reducing design turnaround time and enabling faster validation before engineering implementation.
- Developed reusable design systems, component libraries, and interaction patterns that improved consistency across multiple products and streamlined developer handoff.
- Designed investor pitch decks, landing pages, marketing assets, and product presentations that supported fundraising, product launches, and customer acquisition.
- Produced AI-generated product demonstrations and marketing videos using HeyGen, communicating product capabilities through engaging visual storytelling for customers and stakeholders.

Projects

Top News Personal Project

- Designed a news app focused on simplicity, intuitive navigation, and user engagement.

- Incorporated swipe gestures, animations, and push notifications to enhance interactivity.
- Applied principles of typography, color theory, and imagery for improved readability and aesthetics.
